Skills with grades

- **Teamwork**
 - * written feedback
- **Agile technologies**
- **Cloud, Azure** (5)
- **Container Technology**
- **C, C++, C#, .NET** (4)
- **SQL** (5)
- **React** (5)
- **Python** (5)
- **Java, Javascript** (5)
- **Web development** (5)
- **Testing**
- **REST API**
- **Linux + Kali** (5)
- **Scripting** (4)

Languages

Finnish: Native

English: Excellent

German: Early A1

References

Work Experience

Demola - Internship - System engineer

February 2025 - April 2025

2 months, Oulu, Finland

Mission - To create a remotely controlled drone fleet, which authorities can use for rescue missions.

Successes: In one week I was able to create a development environment for the whole chain - Drones/Simulation - Server - User

This same problem was tried by two other teams for well over a month without success.

Technologies: C++, SITL, MAVSDK, WSL, Git and Kanban.

Fitwarehouse - Store Manager

May 2019 - February 2024

4 years 10 months, Oulu, Finland

As a **Store Manager**, I learned skills for coding... independent working, efficiency and problem solving skills.

Education

Oulu University of Applied Sciences:

Information and communication technology engineer (2022-2025)

Military Service: Sub-Sergeant (2016)

High School: Kastelli (2012–2015)

Who I Am

I am an efficient and detail-oriented individual with a strong work ethic. My ability to think critically and solve problems enables me to perform tasks effectively and accurately. I am a team player who values open-mindedness, reliability, and good communication in the workplace. For example, I successfully led a team of five to complete a project ahead of schedule while maintaining high-quality standards. In my free time, I actively seek new challenges and experiences, whether learning a new skill or taking on a new hobby.

Portfolio

Personal Projects:

Link to my page with more projects and videos: https://pultti.github.io/Web_Portfolio/

Thesis - Grade 5 - "User Authentication in .NET Environment"

Using Microsoft Azure, SAML, and OAuth: Exploring the Viability of In-House Authentication Solutions vs. External Libraries with API usage.

Link: <https://www.theseus.fi/handle/10024/873878?show=full>

ToDoApp - A mobile app built with React, where customers can easily make notes in a local memory and schedule tasks with API usage.

TryHackMe Cybersecurity Courses - Focus on pentesting principles and networking.

* Pentesting principles & Networking Nerd.

Summer project (7 ECTS): Practical pentesting using virtual machines, Kali Linux, and tools like NMAP, Metasploit, Burp Suite, OWASP ZAP, Hydra, and DIRB.

Java Quiz Game - 13/13 - Backend Spring Boot application for a simple quiz game.

Python game - Grade 5 - Advanced programming final project. The game considers process management, processes, threading, PCU scheduling, process synchronization and main memory usage.

Portfolio Website: - OnGoing - personal portfolio hosted on GitHub Pages.

Group Projects:

Drone project: Grade 5 - System for Autonomous drone fleet that can be remotely controlled.

Teknologies: C++, SITL, MAVSDK, WSL

Tasks: Project manager & system engineering

Link: https://www.youtube.com/watch?v=4woO_ZCdlvg

ATM Simulator (Full Stack): Grade 5 - This project simulates an local ATM with functioning database.

Teknologies: C++, Node, MySQL.

Tasks: Secretary, withdrawal and transfer features.

Link: <https://github.com/Pultti/ATMSimulator>

React Movie App (Full Stack): Grade 5 - A film database web application that allows you to add films and actors.

Teknologies: React, Node, PostgreSQL, API usage

Tasks: Project manager, documentation, Kanban board, secure login, user profiles, and testing.

Link: <https://github.com/TVT22-6/movieApp>

React & Kotlin Mobile App (Full Stack): Grade 5 -

React - Market app with Firebase, PayPal API usage.

Kotlin - dog care app with firebase API usage.
